HYGIENE AND DISINFECTANT MAT

Healthy feet are essential
for cows' general health and welfare

An automated hoof care concept | Healthy hooves | Lower veterinary care

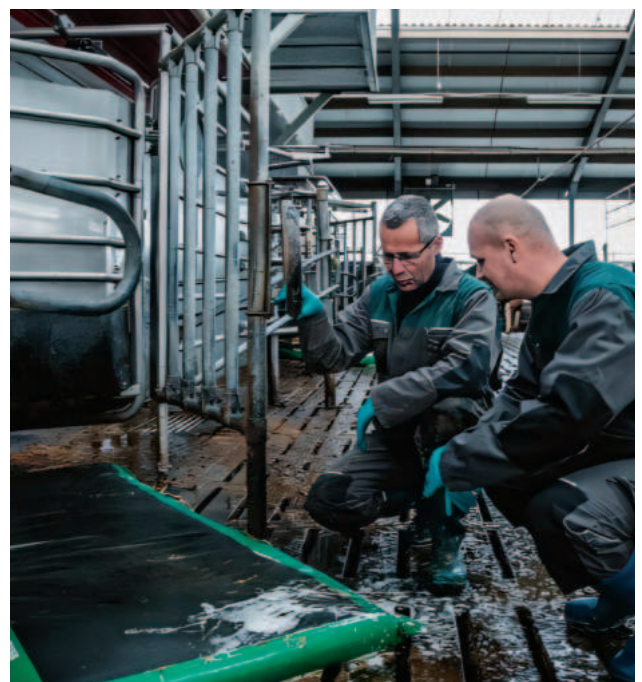

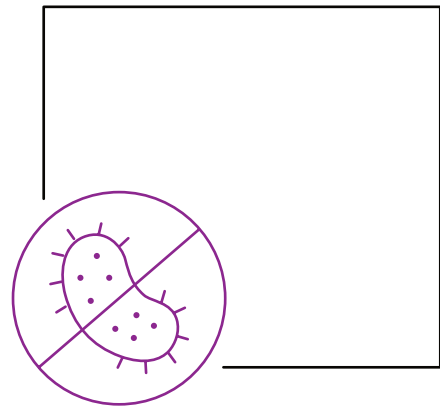

ERSTA HYGIENE AND DISINFECTANT MAT

Healthy feet are essential for cows' general health and welfare. Sick cows are less productive and fertile. That is why we created an automated hoof care concept.

Foot baths and hoof disorders can have a negative impact on the number of visits to the milking robot. For this reason, as well as the great deal of work involved, they are not often used. Furthermore, most foot baths contain aggressive, acidic products that can affect the skin around the hoof. That's a shame, because the cow deserves better!

HYGIENE AND DISINFECTANT MAT

The device comprises a hygiene mat, automatic pump, and control system. The mat contains disinfectants and cleaning products and is generally placed at the milking parlour exit. For five days a week, the mat is injected with a MS AutoHoofClean solution; for the remaining two, it is replaced by a disinfectant.

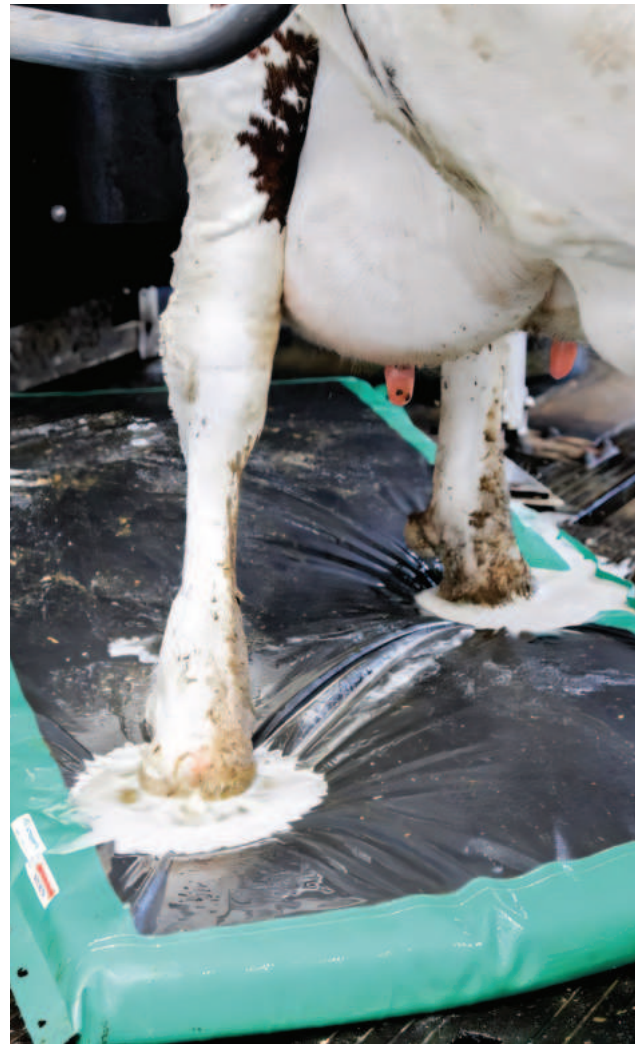

Key mat parameters

- **24/7 hoof care.**
- **Decrease in labour costs and operation requirements up to 30 %.**
- **Lower veterinary care costs up to 40 %.**
- Easy to install in all operations.
- Automatic solution refills.
- Solutions optimised to ensure cow skin pH remains neutral.
- Eco-friendly solutions containing natural extracts.
- No stress for cows when passing over the mat.

WE DON'T DELIVER HOOF PRODUCTS WE DELIVER HOOF SOLUTIONS

The ERSTA Hygiene and disinfectant mat's concept is the ideal method for managing and preventing hoof problems. The automatic system is easy to install and requires little maintenance. It is a proven concept that can improve hoof problems on your farm.

- ✓ 60% mortellaro reduction
- ✓ Cleans and treats the claws
