# STRAW DISTRIBUTION SYSTEM

Automatic distribution of straw  
Optimize straw consumption with us

Reduces straw consumption

| Increases milk yield

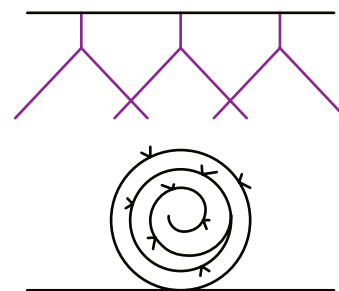

| Better udder health

# ERSTA STRAW DISTRIBUTION SYSTEM

## Automatic distribution of straw. Optimize straw consumption with us.

- Improves animal's welfare
- **Reduces straw consumption by up to 80%**
- Capacity from 1 to 10 L
- Increases milk yield
- Better udder health
- Automatic distribution of straw
- Allocation of straw several times a day
- Amount of straw is adjustable per dosing unit
- Improves the working environment
- Increases dry matter content in manure – more efficient biogas production
- Also suitable for other bedding products, e.g. sawdust

ERSTA transports cut straw by means of the special transport system, controlled.

Along with the straw dosing units, this provides a system that can distribute straw at the desired times and amounts during the day.

You can design the system according to individual needs and farm layout.

Each line in the system has a max length of 400 meters, and it is possible to design the system in several lines according to the farm layout. In the different parts of the system, it is possible to have up to 5 different automatic dosing strategies.

- ✓ Straw humidity of max 14%
- ✓ Straw length maximum 40 mm
- ✓ Option for chopping and tearing equipment
- ✓ Option to use other bedding products, e.g. sawdust

### Straw rivet

- Different solutions
- Fully automatic
- Suitable for both big and round bales
- Simple and reliable
- Possible to use own straw
- Time saving
- Closed system that reduces dust nuisance

We will be happy to answer any questions you may have. Give us a call or send us an email.
